

Property Manager User Manual

Introduction

Effective property management is crucial for maintaining the longevity and value of real estate assets, yet it remains one of the most under-digitized sectors in property investment. From tracking light bulb inventories to coordinating roof repairs, today's property trustees often juggle spreadsheets, emails, and manual approvals that leave room for error and inefficiency.

A modern Property Management System can streamline operations by centralizing data by storing building and tenant information, maintenance logs, and financial records in one secure platform.

By digitizing property management, stakeholders can shift from reactive troubleshooting to data-driven, proactive asset optimization—ultimately maximizing property value, reducing operational costs, and improving tenant satisfaction.

Requirements

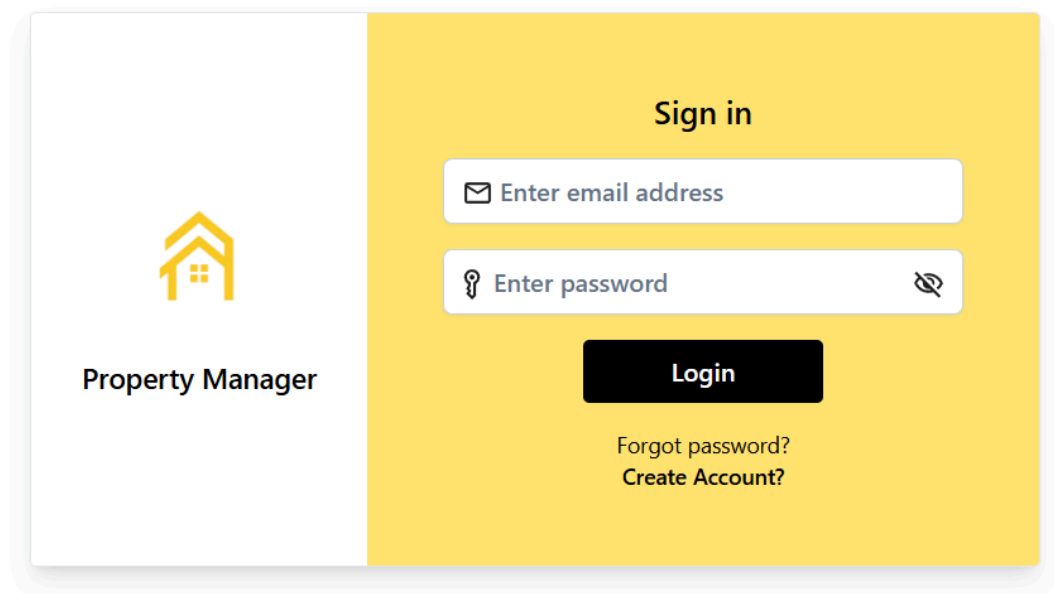

1. Supported web browsers include
 - Google Chrome
 - Microsoft Edge
 - Mozilla Firefox
 - Saffari
2. Supported mobile versions include
 - Android version 11+
 - IOS version 14+

Getting started

Register and Login

1. Login

The first time opening the website will show the login page, if you have not setup an account before select “Create Account?” to register a new account, If you have already registered skip step 2.

2. Register

This will open the register hub, our website has three different types of users: Body Corporate, Trustee and Contractor. Each user has different features and access rights.

2.1 Body corporate: Manages trustees and buildings, has an overview of entire system

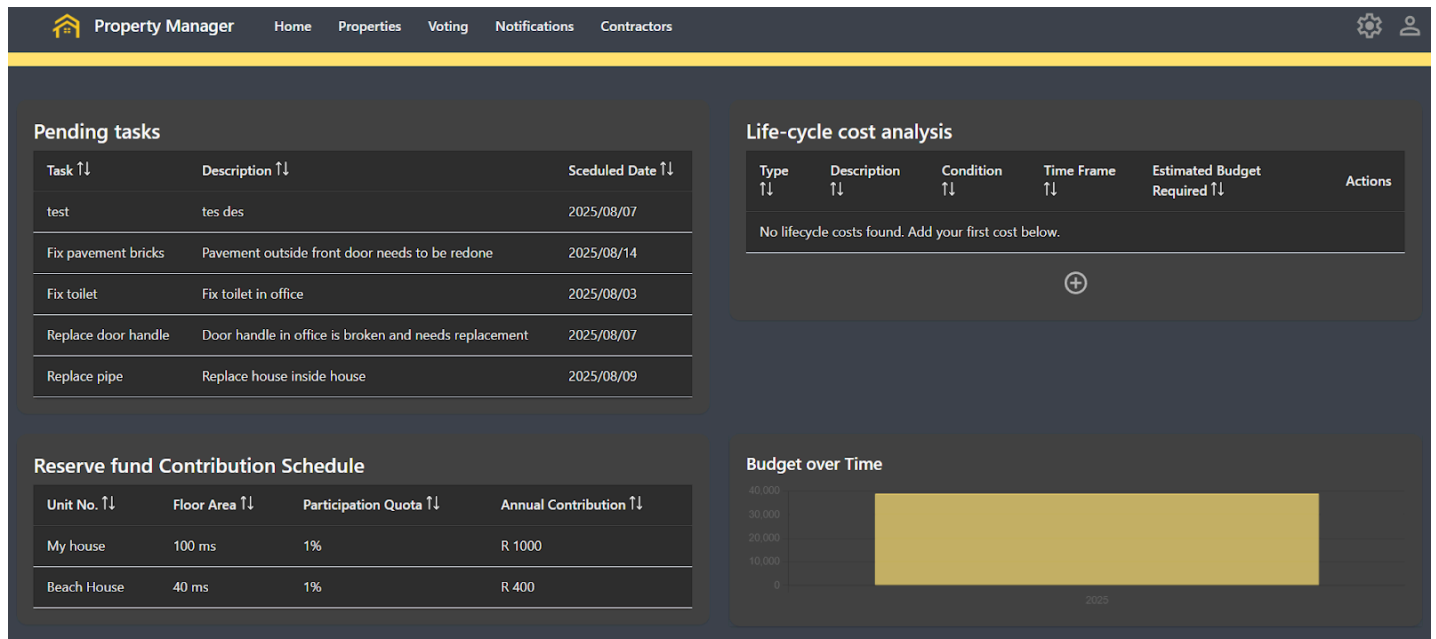

2.2 Trustee: Able to manage their own properties including inventory, budgets and maintenance tasks

2.3 Contractor: Sets up a profile and is assigned maintenance tasks by body corporates and can submit quotes.

The new user can decide which type of user they would like to register as.

3. Home page

3.1 Body Corporate Home

This is a dashboard of the overall body corporate. From here you can see pending tasks, life-cycle cost analysis, reserve-fund contribution schedule and the 10-year maintenance graph. All will be updated dynamically as more properties are added to the body corporate except for life-cycle costs.

3.1.1 Adding a Life-cycle cost

Add new cost to the Life-cycle?

Type of grouping

Description of item

Condition of item

Time frame for maintenance

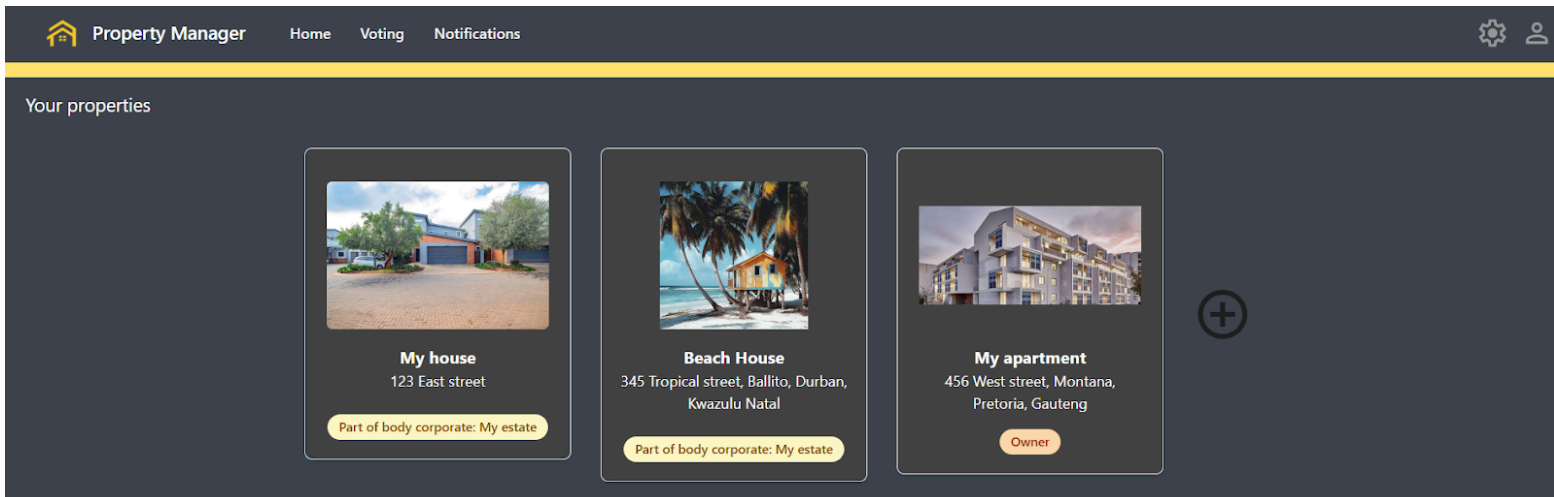

Estimated budget required for this task

Cancel

Add cost

To add a new lifecycle cost, simply fill in the form with the required details. Start by selecting the Type of grouping (such as repair, replacement, or upgrade). You can then provide a Description of the item to explain what the cost relates to, followed by the Condition of the item to indicate its current state. Next, enter the Time frame for maintenance to show when the task is expected, and finally add the Estimated budget required for this task. Once all the details are completed, save the entry to record the lifecycle cost.

3.2 Trustee Home

This is the home page of the trustee user and the properties page for body corporate users where they can view and create properties. To create a new property click the plus icon and fill in the form.

3.2.1 Creating a property

The screenshot shows the 'Create New Property' form within the 'Property Manager' application. The form is titled 'Create New Property' and contains several input fields and a dropdown menu. The fields are: 'Property Name *', 'Area (m²) *', 'Property Value *', 'Assign to Body Corporate *' (a dropdown menu with 'Select a body corporate' and a close icon), 'Street Address *', 'Suburb', 'City', 'Province', 'Type', and 'Body Corporate'. There is also an 'Upload Image' button and a 'Create Property' button. The form is designed to collect all necessary information to register a new property in the system.

This page is used to register a new property in the system. Begin by filling in key details such as the property name, address, type, and any additional specifications. Use the provided fields for information like property value, area, or assign it to a body corporate. You can also upload an image to visually represent the property. Ensure

that all mandatory fields are completed, as these are necessary for the property to be saved. Once the form is filled out and reviewed, click the submit button to add the property to the database. This will make it available for future tasks, maintenance scheduling, and reporting.

3.2.2 Viewing a property

The screenshot displays the 'Property Manager' application interface. At the top, a navigation bar includes a home icon, the title 'Property Manager', and links for 'Home', 'Voting', 'Notifications', and 'View House' (which is highlighted). On the right of the navigation bar are settings and user profile icons. The main content area features a large image of a house labeled 'My house'. Below this, the interface is divided into three panels:

- Inventory:** A table with columns for Description, Quantity, Price of each, and Actions.
- Budgets:** A section showing the 'Overall Allocated Budget' and two sub-budgets: 'Allocated Inventory budget' and 'Allocated Maintenance Spent', with a 'Manage budget' button.
- Timeline:** A vertical list of tasks with circular icons, including 'test', 'Fix pavement bricks', and 'Fix toilet', with a plus icon at the bottom to add more tasks.

Description ↑↓	Quantity ↑↓	Price of each ↑↓	Actions
Door handle	2	R 50	+ - ✎
Light Bulb	3	R 20	+ - ✎
Pipes	4	R 100	+ - ✎
Bricks	25	R 20	+ - ✎

Budgets
Overall Allocated Budget
R 21 440

Allocated Inventory budget	Allocated Maintenance Spent
R 13 240	R 8000

Manage budget

Timeline

- test
- Fix pavement bricks
- Fix toilet
- + (Add task)

This is an overall view of a specific property for the body corporate and trustees, here you can view the inventory budget and maintenance tasks while trustee users can edit the inventory, budget and add maintenance tasks.

3.2.3 Adding an inventory item

Add new inventory item?

Add new item and update budget.

Inventory item name

Price for one

Quantity bought

Bought on

Cancel

Add item

Trustees can add inventory items to their properties which contractors can use on maintenance tasks if it has been allocated. By filling in the fields and clicking add item a new inventory item is added to the table. The quantity can be changed by using the actions button found in the view house page. This will also dynamically decrease the budget.

3.2.4 Adding a maintenance task

Add new task to timeline?

Update timeline with a pending task

Task name

Task description

Assign inventory items to task

Available Inventory Items

Upload picture of task for the contractors

Choose

No file chosen

Proposed due date

Assign a priority

Priority

Cancel

Add item

Trustee can add maintenance tasks to their properties by filling in all the fields including uploading an image of the actual task for the contractor to see.

Once added the body corporate user would first have to approve of the task and assign trusted contractor before voting can commence (see).

3.2.5 Viewing a maintenance task

Property Manager Home Voting Notifications **Task details**

Task: Fix toilet
Description: Fix toilet in office
Due Date: 2025/08/03
Priority: **High**
Assigned contractors: David's plumbing

Inventory items assigned

Description ↑↓	Quantity ↑↓
Pipes	8

Contractor timeline

Ongoing
2025/08/12 8:21

Started fixing toilet by removing old toilet

Once a task has been created the trustee and body corporate user can view the task details which includes the inventory items assigned and the contractor timeline which including all progression made on the actual task. Contractor users can add to this timeline

3.2.6 Creating a budget

Create new budget?

Allocate budgets to inventory and maintenance tasks

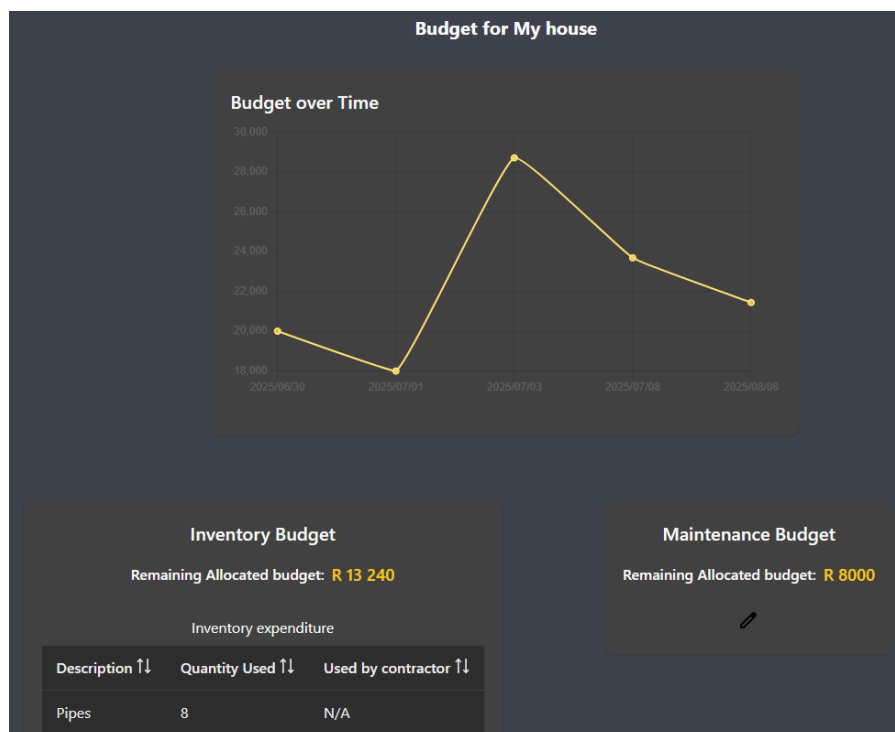

Inventory budget allocation

Maintenance budget allocation

Cancel **Create budgets**

If you havent created a budget yet you will be greeted with this dialog for creating the budget. Once created the user can view the "Manage budget" page (see 3.2.6)

3.2.7 Manage budget

This is a view of the budget of a specific property, where a trustee can edit budgets by clicking on the pencil icons. Two types of budgets exist, inventory and maintenance budgets. Each budget displays how money is being spent in the property.

3.3 Contractor Home

Property Manager Home Notifications My Profile Dashboard Assigned projects Submitted quotations Help Home > **Contractor Dashboard**

Available Projects

Fix toilet
Fix toilet in office

Fix pavement bricks
Pavement outside front door needs to be redone

Replace door handle
Door handle in office is broken and needs replacement

This is where the contractor sees available projects and clicks on the on one of the cards to submit a quotation.

Create Quotation

Issue Date

Expiration Date

Quote No.

Total amount

Choose

No file chosen

Upload

Create Quote

When submitting a quotation we need an issue Date, expiration date, alphanumeric Quote No. and Total amount. And upload a file then click the create quotation button to create a quotation.

Submitted quotations

Quote #1	Quote #2
Amount: R5,000.00 Status: APPROVED Date: 04/08/2025, 02:00:00 Document: quote_1.pdf APPROVED	Amount: R5,000.00 Status: APPROVED Date: 04/08/2025, 02:00:00 Document: quote_1.pdf APPROVED

Once the contractor has completed a quote they will show up on the submitted quotations with the status:-

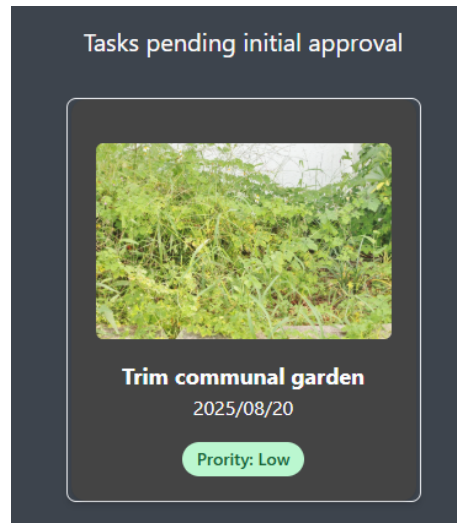

- Pending
- Successful
- Unsuccessful

4. Voting

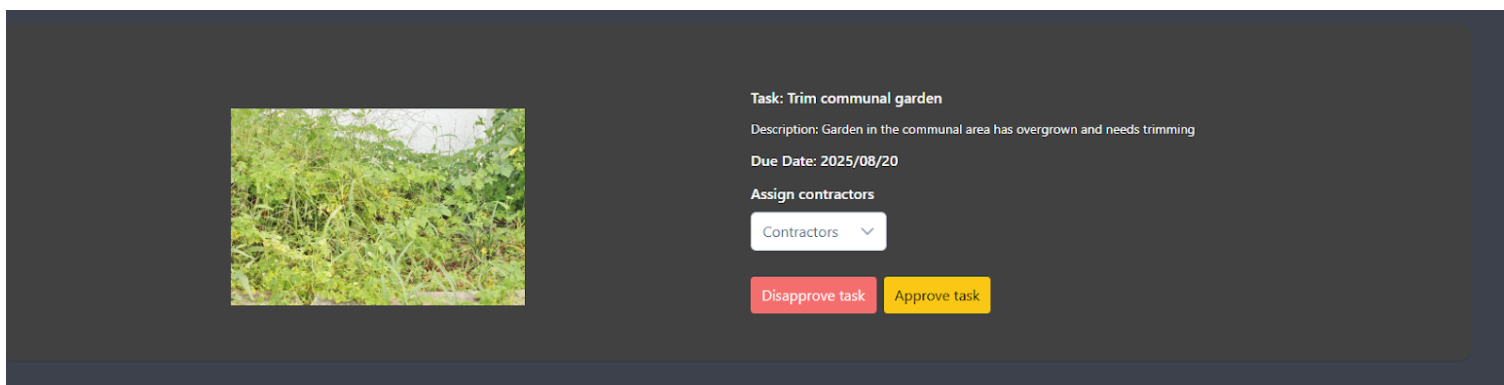

4.1 Body Corporate voting system

For the body corporate there are 4 “stages” of voting:

1. Task approval

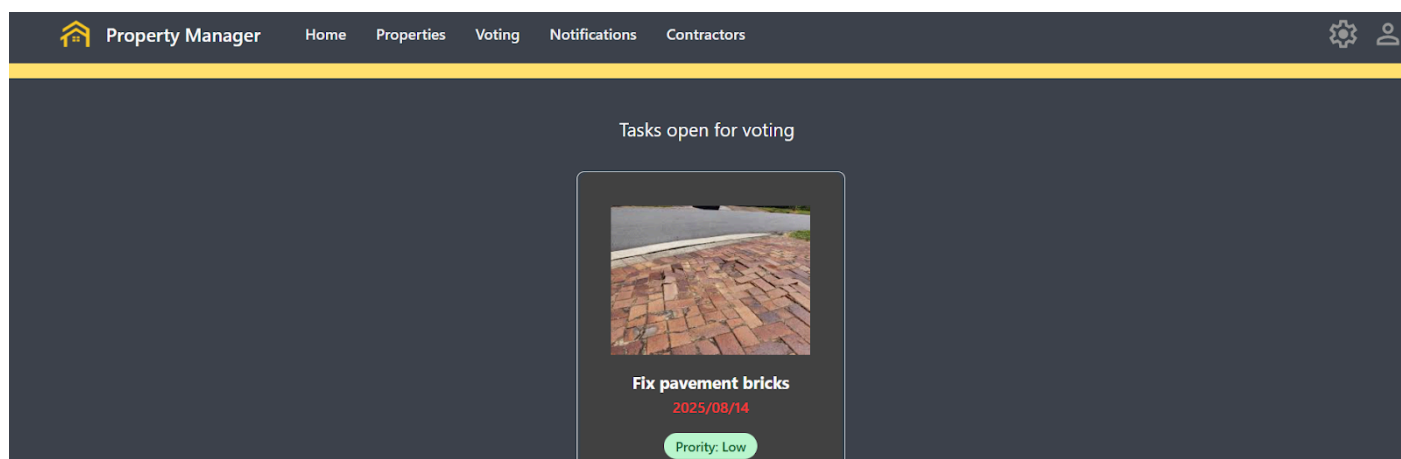

The body corporate user can see the task details including a picture, the deadline for when the task needs to be done and its priority level. By selecting it the user will be taken to the “Validating Task” page

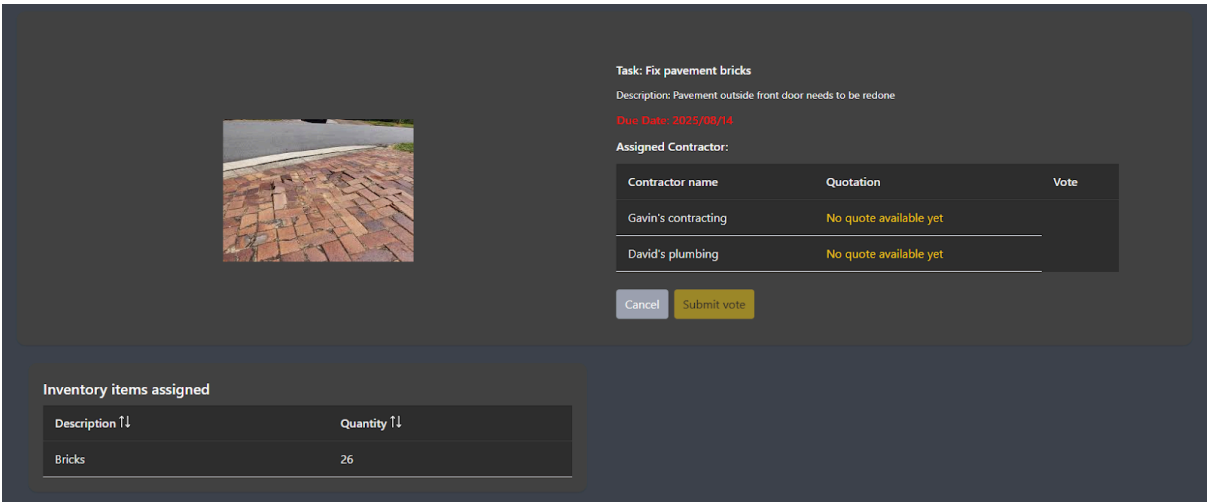

Here the user can first select contractors from their trusted contractor list and then approve of the tasks which sends the information to the contractors or disapprove of the task completely.

2. Tasks open for voting

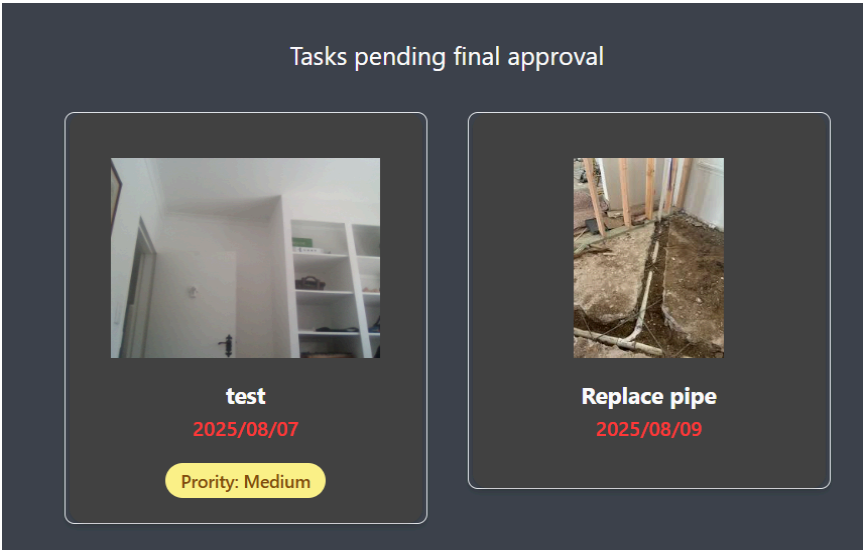

Similar to 1, the user can see the task which has been approved which is now open to voting.

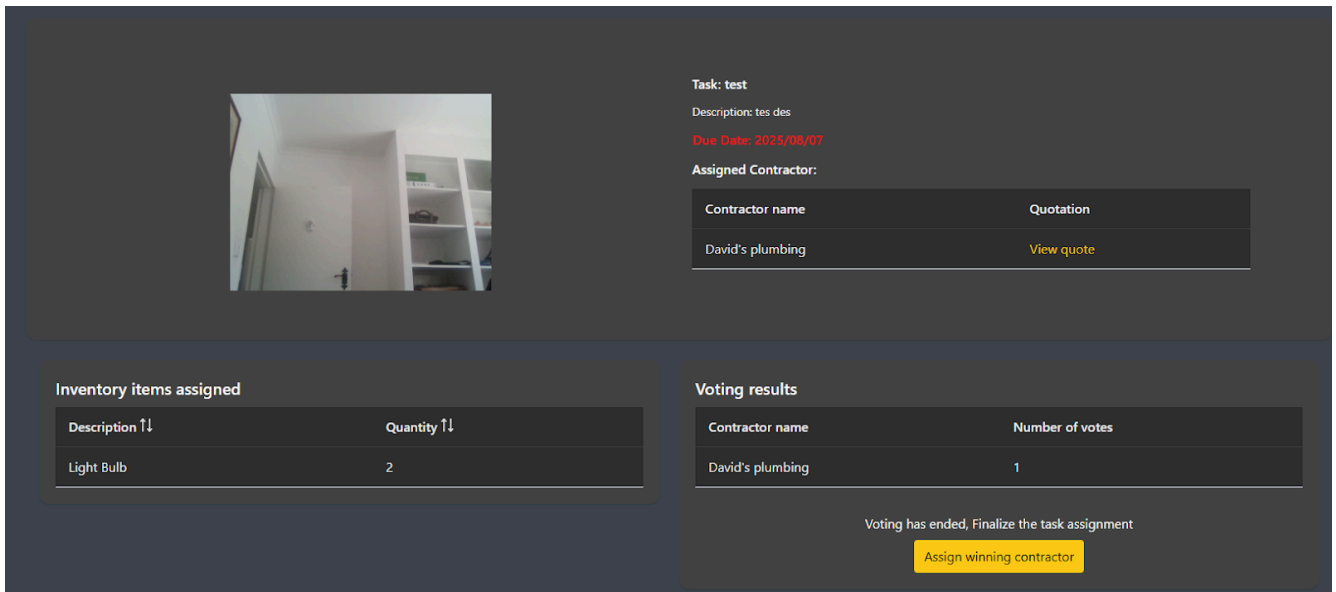

Here either the body corporate user or the trustee user can view quotes that have been uploaded by the contractors assigned and vote for their preferred contractor to take the job. Note that a user can only vote for one contractor and can only vote once.

3. Tasks awaiting final approval

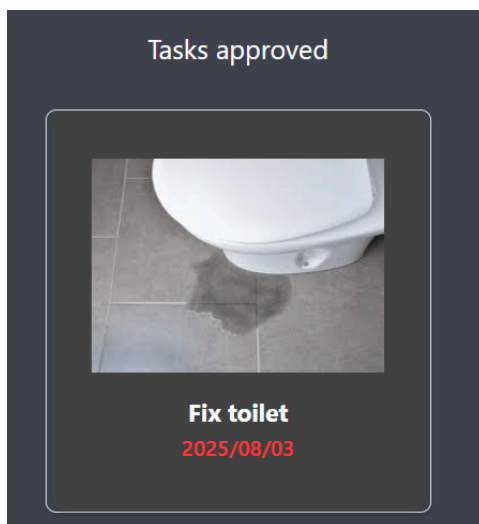

After voting has ended the task await final approval from the body corporate user.

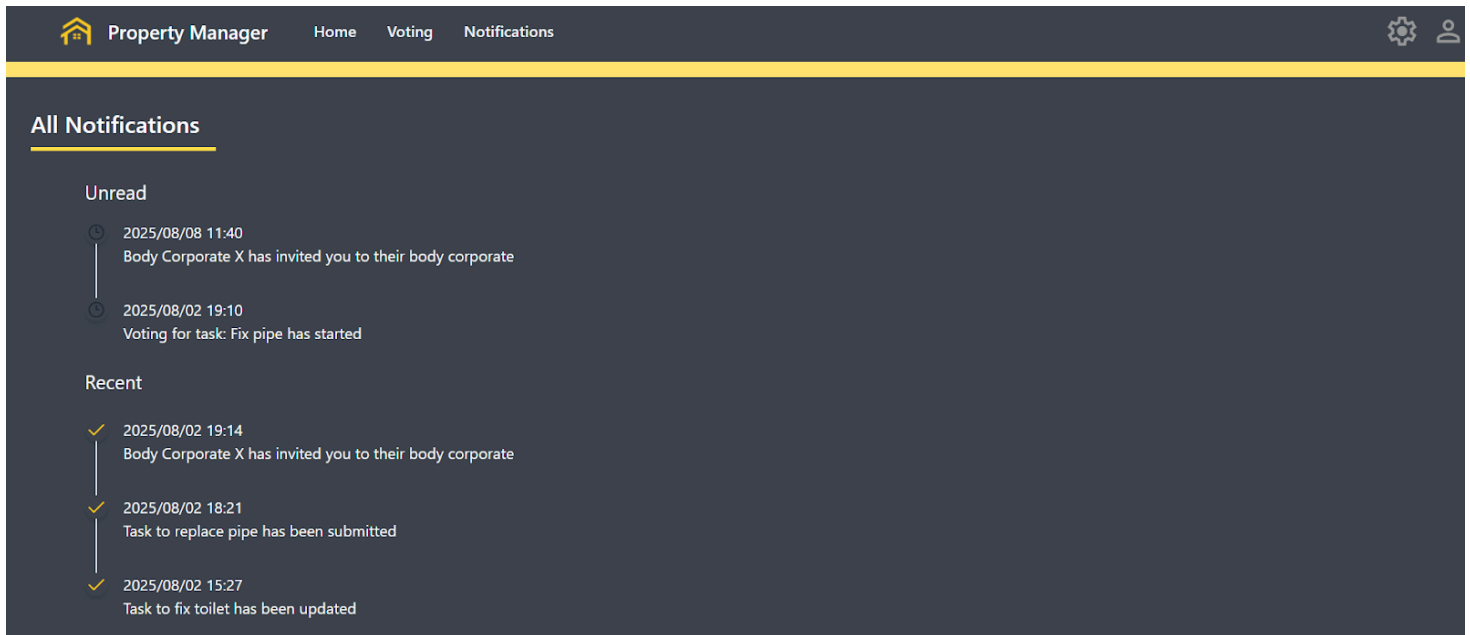

Here the body corporate user can see how many votes the winning contractor received as well as being able to official assign the contractor. This will officially make it the contractors task to due and they can start working on it and sending updates (see 3.2.5)

4. Approved tasks

Here, the body corporate user can see a history of all previous tasks. Including quotes and which contractor won the vote

5. Notifications

This is the notification hub for all users, here you can see all activity happening in the property manager app. Clicking on a notification takes you to where the notification occurred. Selecting an unread notification marks it at read.

The screenshot shows the 'Contractor Profile' page of the 'Property Manager' app. The top navigation bar is identical to the previous screenshot. The main content area is titled 'Contractor Profile' and features a form for entering details. The form is divided into two columns. The left column, titled 'Enter Details Below:', contains input fields for 'Full Name / Company Name', 'Email Address', 'Phone Number', 'Address', 'City', 'Suburb', and 'Postal Code'. The right column, titled 'Upload a Profile Image', contains a large image upload area with a small image icon and a yellow 'Upload Image' button. A yellow 'Next' button is located at the bottom right of the form.

6. Contractor Profile

This page provides a detailed view of a contractor's information. It includes their name, contact details, address, services offered, and any relevant registration or license numbers. You can also view uploaded certifications and past project history. If you have the correct permissions (e.g., trustee or property manager), you can

update their profile details, upload new documents, or make changes to their listed services. This page is useful for verifying contractor qualifications and tracking their relationship with the body corporate over time.

7. Ratings

Rate a Contractor

Select a Task *

Repair Elevator

Contractor

New Body Corp

Add a comment (optional)

Comment

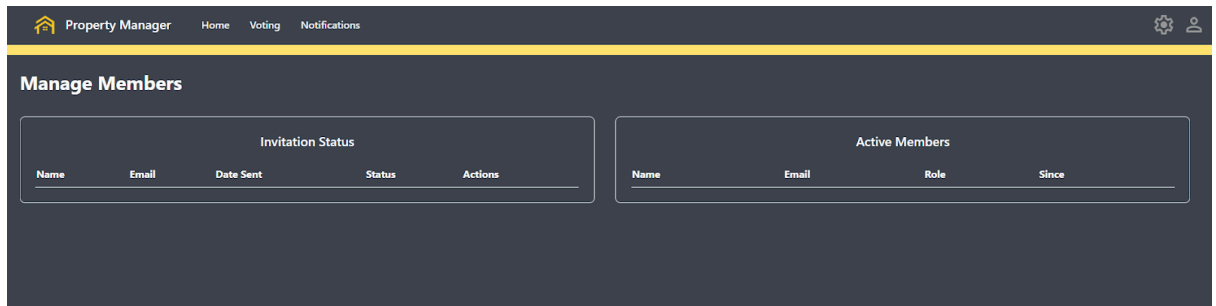

Submit Rating

Ratings History

Task	Contractor	Rating	Comment	Date
N/A	New Body Corp	9	Excellent work!	
N/A	New Body Corp	8	Its good but not great	2025-08-10

The Ratings page is where trustees and property managers can evaluate contractor performance after a task has been completed. Start by selecting the completed task from the task dropdown list. The associated contractor’s details will automatically populate. Use the rating slider to assign a score based on quality of work, timeliness, and overall satisfaction. You may also provide written feedback in the comment section to highlight strengths or suggest improvements. When all information is entered, click submit to record the rating. These ratings help inform future contractor selections and maintain quality standards.

8. Members

The Manage Members page allows you to oversee all individuals within your body corporate. It lists members by name, role (trustee, property manager, etc.), and current status. You can view invitation statuses to see who has accepted, declined, or not yet responded. Trustees can approve or remove members as needed and send new invitations to prospective members via email. This page helps ensure that the body corporate keeps up to date with this.
