TECHNICAL SKILLS

- Languages:
Java, Python, C++, JavaScript, Typescript and R
- Frameworks:
Angular, React, Spring Boot, Ionic
- GitHub, GitHub actions and Docker

SOFT SKILLS

- Critical thinking
- Communication skills
- Leadership
- Teamwork
- Adaptability

Sean Maritz

FINAL YEAR COMPUTER SCIENCE STUDENT

Aspiring software developer with strong problem-solving skills, seeking opportunities to apply academic knowledge to real-world systems in backend development and data-driven applications

EDUCATION

BACHELOR OF SCIENCE (COMPUTER SCIENCE) UNIVERSITY OF PRETORIA

Jan 2023 - Dec 2025

- First year average of 76% and was on dean's list
- Second year average of 77% and was on dean's list
- Final year project: Project leader of a team that created a property maintenance tool that simplifies the overall process and steps in maintenance. Worked on Frontend development and DevOps

NATIONAL SENIOR CERTIFICATE

Curro Roodeplaat High School

Jan 2018 – Dec 2022

- Distinctions: Information Technology (92), Accounting (89), Business studies (89), Afrikaans First Additional language (85), Mathematics (80), Life orientation (81), English Home Language (80)

EXPERIENCE

Mentor | Keep that Gold Shining

Feb 2024 - Oct 2024

Participated in a mentorship program where I was a mentor for high school students from impoverished areas seeking career advice, what to expect transitioning from high school to university and helping them create university applications.

Tutor | University of Pretoria

Feb 2025 – Jun 2025

I tutored students for a net centric computing second year module where I helped and graded students' practical assignments which included website creation and design.

PROJECTS

2024

- Implemented a terminal-based game with an AI opponent using a Best First Search algorithm which focused on clean game-state management.
<https://github.com/Sean-Mp/Python-Tic-Tac-Toe>
- Created a mobile application that enables users to track their gym workouts and nutrition, uses the ionic framework for a hybrid mobile application and JavaScript based backend. <https://github.com/Sean-Mp/MyGym-App>
- I was part of a team that created a terminal based city builder project in C++ for a second-year project. Contributed to citizen creation and voting systems.

2025

- I was part of a team that created a NoSQL database application and website for a third-year project. Contributed to the REST API and backend systems.
